Committee representation

The Electrotechnical Industry Standards Committee under whose supervision this Malaysian Standard was prepared, comprises representatives from the following Government Ministries, trade, commerce and manufacturer, associations and, scientific and professional bodies.

Jabatan Bekalan Elektrik (JBE)
Jabatan Kerja Raya (JKR)
Jabatan Telekom Malaysia (JTM)
Lembaga Kemajuan Perindustrian Malaysia (MIDA)
Malaysian Electrical Appliances and Distributors Associations (MEADA)
Ministry of Domestic Trade and Consumer Affairs
The Institution of Engineers, Malaysia (IEM)
Universiti Teknologi Malaysia (UTM)

The Technical Committee on Generation, Conversion, Transformation and Storage of Electrical Energy which prepared this Malaysian Standard consists of the following representatives:

Prof. Dr. Ir. Hj. Hashim Shaibon (Chairman)	Universiti Teknologi Malaysia
Encik Mohd. Nazri Shaari	Jabatan Bekalan Elektrik
Encik Mohd. Rumai Abdullah	Tenaga Nasional Berhad
Encik Abdul Rahim Salleh	Jabatan Telekom Malaysia
Encik Abu Bakar Hassan	Malaysian Institute of Microelectronics System
Encik T. Palanisamy	Jabatan Kerja Raya
Encik Wee Ton Wang	Lembaga Kemajuan Perindustrian Malaysia
Encik Carlo Rangrazio	Malaysian Electrical and Electronic Industry Group
Encik Abdul Ghani Zainal Abidin	Jabatan Telekom Malaysia
Encik Ismail Mat Daud	Pusat Sains dan Teknologi Pertahanan
Encik Zulkeply Abd. Wahid	Tenaga Nasional Berhad
Encik Mohd Rozailan Ibrahim	Universiti Malaya
Encik M. Zamri Mustaffa	Standards and Industrial Research Institute of Malaysia
Puan Rosnah Mohd Yusof (Secretary)	Standards and Industrial Research Institute of Malaysia

NATIONAL FOREWORD

This Malaysian Standard was developed by the Technical Committee on Generation, Conversion, Transformation and Storage of Electrical Energy under the authority of the Electrotechnical Industry Standards Committee.

This Malaysian Standard is identical with IEC 60478-4:1976,'Tests other than radio-frequency interference',published by the International Electrotechnical Commission (IEC). It has been adopted in total under the recommendation by the Technical Committee on Generation, Conversion, Transformation and Storage of Electrical Energy in the interests of international harmonisation and trade.

The text of the IEC Standard is recommended for publication as a Malaysian Standard without deviation. However, for the purposes of this Malaysian Standard, the text of the IEC Standard given herein should be as follows:

a) IEC Standard read as Malaysian Standard;

b) the comma which is used as a decimal sign (if any) read as full point; and

c) the basis IEC 60478-4 is printed in English and French languages. However, only the English version on odd pages is retained for this Malaysian Standard.

In 1997, the IEC introduced a new numbering system for all of its international standards, guides and technical reports. The number for this standard is MS IEC 60478-4:1996.

Compliance with a Malaysian Standard does not of itself confer immunity from legal obligations.

NOTE. IDT on the front cover indicates an identical standard i.e. a standard where the technical content, structure, wording and presentation of a Malaysian Standard is exactly the same as in an international Standard or is identical in technical content and it may contain the minimal editorial changes specified in clause 4.2 of ISO/IEC Guide 21.
